

WOOD Doors External

K0810 (up to 100kg)

- For rigid sliding door leaves mounted externally
- Rollers are aluminium with Delrin wheels and **stainless steel pins** for use in external applications or aggressive atmospheric environments
- Upper sliding movement, leaving the lower section free
- Complete with rubber bumper stop
- Adjustment: the stop brake is adjustable according to the door's weight

2m lengths of track are stocked as standard.
Other lengths available upon request.

For side-mounting (face fixing) please request K0810 80x700 brackets to suit (1 per 40cm track).
